**Subject:** Week 2 Sampling - Dimock (1 of 4)

Hi, Kelley. Over the next few minutes, I'm going to send you memos for the homes sampled during Week 2 that had no exceedances of triggers. These include HW09, HW13, HW20, HW28a, HW33/33a/33b, HW42, HW46, and HW52. Because I'm at home and using Webmail, I can only attach two files per e-mail, so you'll be receiving four e-mails altogether (including this). Next, I'll start drafting the memos for the wells with findings.

Couple things: 1) I didn't mark these memos as draft, but do consider them draft until your review. If you need me to add, subtract or clarify, let me know. 2) I have data for HW28a, but not for 28 or 28b; you may have sent these files to me and I neglected to print them, but I can't check that because I don't have access to my archived files at work. If you can just send me the analytical summaries for HW28 and HW28b, I'll modify the conclusions in the HW28a memo to include these results.

Thanks, Kelley.

Dawn
